

## Cooper Crouse-Hinds SmartGuard

SmartGuard protective plates provide the most cost effective way to protect commercial and residential electrical boxes and wiring from sheetrock mud, sanding dust, and paint. The router resistant material helps reduce expensive and non-productive call backs and reworks. The see through clear cover makes inspection quick and easy. SmartGuard. Its name says it all!

### Applications

SmartGuard covers are available to provide protection

- For use with single-, two-, three-, four- and five-gang commercial or residential boxes/plaster rings; with or without devices, switches, GFCI, etc. installed
- Commercial or residential ceiling boxes
- 6" commercial or residential lighting "cans"
- 14" or 24" wide breaker boxes

### Material & Finish

- High-impact, router-resistant PVC
- Natural finish

### Features & Benefits

- Seals out sheetrock mud, sanding dust and paint overspray to keep the electrical box and its wiring free from contaminants
- Router resistant material provides mechanical protection to box and wiring and speeds up trim process
- Clear material makes visual inspection quick and easy
- Less expensive and easier to use than metallic alternatives
- Reduces risk of call backs and expense of rework because of wire and box damage
- SmartGuard serves as a guide for router in cutting out boxes
