**One 2-note, white door chime  
Model BK140LWH**

- One 2-note, white door chime
- One lighted white pushbutton
- Sold in packs of 24
- One junction box (C915) transformer
- **Exclusive transformer design takes valuable time out of the installation process.**

We've made installing a wired door chime as easy as pushing a button. Our new junction box transformer chimes are an innovative, time-saving solution that eliminates the need to run a wire from the transformer to the chime mechanism. Instead, the transformer is installed on a single gang junction box and the chime mechanism simply attaches to the metal plate. It's another time-saving solution from NuTone.
