

ENCLOSURES

Standard Enclosures

Our durable enclosures range in size from 12 to 42 inches to suit any installation. Every enclosure is made in the USA and contains mounting holes that support both bay-style and traditional installations. Three 2.5 inch openings and a pair of electrical knockouts make pulling wire a cinch. Our enclosures also include knockouts, a grounding screw, side lances, and side tabs for more flexible mounting options. Available with hinged or screw-on doors, a UL-approved On-Q enclosure is the easy choice for professional projects.

EN1200

12" Enclosure with Screw-On Cover

EN1200

12" ENCLOSURE WITH SCREW-ON COVER

This 12 inch enclosure is ideal for entry-level structured wiring systems. Each durable enclosure contains bay-style mounting holes, a cable guard, large top openings that make pulling wire a cinch, as well as knockouts, a grounding screw, side lances, and side tabs for more flexible mounting options. This enclosure ships with a screw-on cover and is finished in a smooth white powder coat.

Notes: 12.13" H x 14.25" W x 3.6" D

EN1400

14" Enclosure with Screw-On Cover

EN1400

14" ENCLOSURE WITH SCREW-ON COVER

This 14 inch enclosure is the perfect solution for a basic structured wiring system. It features larger top openings that make pulling wire easier as well as additional knockouts, side lances, and side tabs for more flexible mounting.
