LIGHTING INSTRUCTIONS

- Press button 1x to activate flashlight (top light)
- Slide up to activate work light
- Press 1x to activate red light
- Press 2x to activate red hazard flasher
- Slide down to turn OFF COB

DIMMABLE BEAM

Each light mode is fully dimmable. Hold button for 1.5 seconds to activate dimming function. Flashlight, COB White and Red are dimmable.

- Light will dim from 100% to 10% over 3 seconds
- Light will flash quickly when it reaches 10% or 100% to indicate it has reached the lowest or highest light output
- Release button at any time to achieve desired brightness
- Light will continue to dim/brighten between 100% and 10% until button is released

MEMORY POWER SETTING

SLYDE™KING is equipped with memory settings for each light mode. To program memory settings, start in the OFF position. Flashlight, COB White and Red have this feature.

- Double-tap the button to activate Memory Power Setting. Flashlight (top) will activate
- Follow Dimming Instructions to adjust light to desired brightness
- Press button again to move to next setting. Light will cycle through each light mode sequentially
- Set each light mode at desired brightness level
- If 100% brightness is desired amongst light modes, simply press button to move to the next mode
- Press again to turn OFF

To reprogram, simply repeat the previous steps.

CHARGING INSTRUCTIONS

SLYDE™KING should be connected to a power source using the Micro Charging Cable. Place the Micro USB input into the Port under the silicone cover. Charging light indicator will remain RED until the unit is fully charged then it will turn BLUE.

Recharging may take up to 4 hours based on battery status.

The OC™ (Optimized Clarity) Technology creates a perfectly dispersed beam of pristine light when used in flood mode.

FEATURING NEW

C-O-B is a new innovation in LED technology featuring smaller clustered LED chips that are mounted directly to the circuit board and work together as a single lighting module. C-O-B outperforms traditional lighting by up to 50 times the light output per centimeter of light source.
